QUADRA - CIAKI -

We are pleased to present our new play-ground system from the **QUADRACIAKI** series, whose design is inspired by the iconic Minecraft gaming environment.

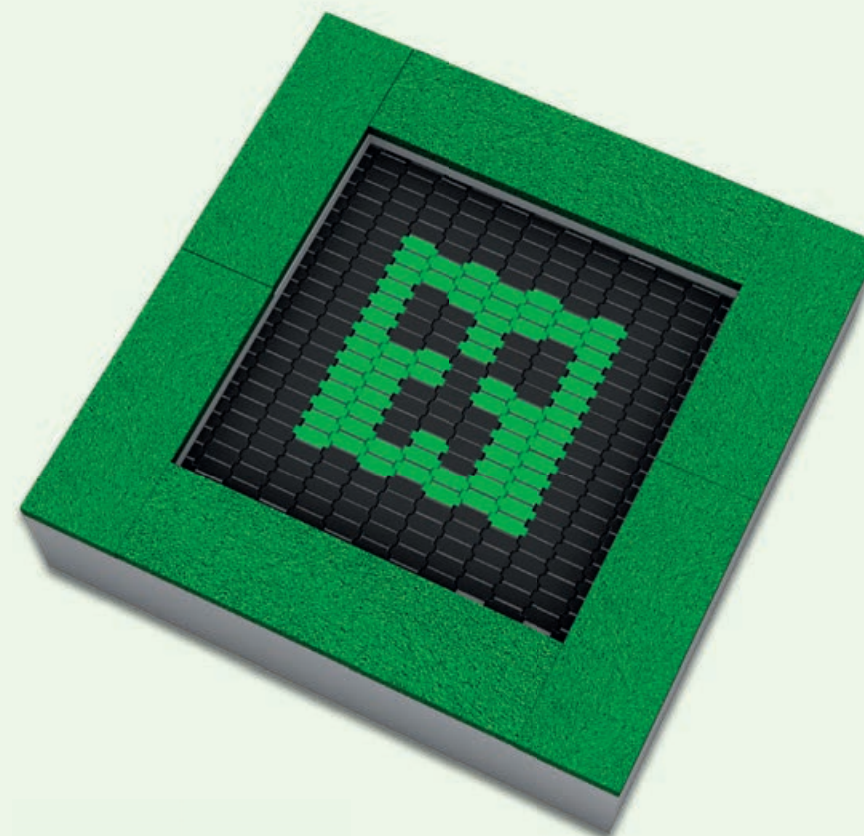

NEW!

QUADRA - CIAKI -

QUADRACIAKI are modular blocks that allow you to model your play area in ways limited only by your imagination. The square and cubic shapes of the equipment enhance the 3D effect enchanted in the structures.

Each cube block is solidly constructed and finished with soft EPDM rubber granulate panels. Immerse yourself in our 3D world and build your own kingdom of imagination!
